WELCOME

ASSEMBLED BY HAND. BUILT JUST FOR YOU.

Your Marina Guard was assembled by hand, piece by piece, to the configuration you chose.

This booklet is written for this watch alone: its crown, its calibre, its sapphire case back, what it can take in water and how to care for it.

For any question, the workshop answers at contact@chrono-mod.com.

01 Your Marina Guard in detail

40 mm cushion case in brushed 316L steel, transparent sapphire case back, leather or rubber strap. NH35 automatic calibre with date.

1. **Crown guard**: the bridge around the crown, with its lever that locks it.
2. **Screw-down crown**: three positions, winding, date, time.
3. **Date window.**
4. **Leather or rubber strap**.
5. Hour **markers**.
6. Hour and minute **hands**.
7. Slim **bezel** on a cushion case.

02 SETTING YOUR MARINA GUARD

The crown

0
Against the case, screwed down, lever folded down: wearing position

1
One click: the date

2
Two clicks: the time; the seconds hand stops

LEVER, THEN CROWN

Before any setting, lift the crown guard lever (it pivots on its pin), then unscrew the crown (towards you) until it springs free: it is then in position 0.

Afterwards, push the crown back against the case, screw it fully down without forcing, then fold the lever back down. Left unscrewed, it no longer keeps water out.

WINDING BY HAND

When worn, your Marina Guard winds itself with the motion of your wrist. Stopped: lever lifted, crown unscrewed, in position 0, 20 to 30 turns clockwise, then wear it. A full wind takes at least 55 turns. Power reserve: about 41 hours.

TIME AND DATE, STEP BY STEP

NH35 calibre · date

1. Lift the lever, unscrew the crown, pull it to position 2 and bring the hands to 6 o'clock: from 9 pm to 4 am, the date mechanism is engaged.
2. Push the crown in to position 1. Turn it counter-clockwise to yesterday's date.
3. Pull the crown to position 2 and move the hands forward: the date changes at midnight. Carry on to the exact time, morning or afternoon.
4. Push the crown back against the case, screw it fully down, then fold the lever back down.

END OF THE MONTH

The date counts 31 days. After a shorter month, advance it by one on the 1st (position 1, outside 9 pm to 4 am).

Recommended start: 6 o'clock

03 THE SAPPHIRE CASE BACK

Your NH35 calibre, through the crystal

1. **Rotor**: it turns as you move your wrist and winds the watch.
2. **Balance**: it beats and regulates the rate.
3. **Transparent sapphire case back**: the reason for 3 ATM.

Turn your Marina Guard over: through the case back, you see its calibre at work.

On a leather strap, take the watch off to wash: leather dislikes water and sweat.

04 WATER: WHAT YOUR MARINA GUARD CAN TAKE

3 ATM

30 m

TRANSPARENT SAPPHIRE CASE BACK

Rain, splashes, washing hands	YES
Swimming	NO
Shower	NO
Sauna	NO

A transparent sapphire case back holds less pressure than a steel back: no swimming or showering with this watch.

05 BRACELET AND CARE

YOUR BRACELET

Your Marina Guard wears the strap chosen in the configurator.

To change the strap: a spring-bar tool, and a 20 mm strap, the width between the lugs of your Marina Guard.

Unsure how to adjust it? The workshop will do it: write to us.

CARE

Avoid shocks and magnets (speakers, magnetic clasps, phone cases). A magnetised watch runs wrong: a watchmaker demagnetises it in a minute.

Soft cloth; lukewarm soapy water on steel or rubber, never on leather.

Leather dislikes water and sweat: take the watch off to wash.

No swimming: your sapphire case back is rated 3 ATM.

IN THE BOX *Your watch, its presentation box and this booklet.*

06 SPECIFICATIONS

CASE	40 mm cushion, brushed 316L steel
DIAL	28.5 mm
LUG WIDTH	20 mm
CASE BACK	transparent sapphire
WATER RESISTANCE	3 ATM (30 m)
MOVEMENT	NH35, automatic, date
POWER RESERVE	about 41 hours; full wind in at least 55 turns
BRACELET	leather or rubber
